Write your team’s answers in the answer book provided

Questions and credits
A. Zoink! Dragomir Radev, Christiane Fellbaum, Jonathan May 20 pts
B. Malagasy crossnumber Tom McCoy 25 pts
C. Maxakali word building Alex Wade, Pat Littell 25 pts
D. Do this do that David Mortensen 30 pts
A. Zoink!  

As everyone who needs to buy widgets online knows, the crowd-sourced website Zoink! is the place to go to get real evaluations from real users of real widgets. You might have the most optaxic widget out there, but unless it’s getting reviewed on Zoink! nobody’s going to hear about it.

To ensure quality, the administrators of Zoink! must continuously delete reviews written by bots, small software programs that pretend to be human reviewers. The admins can’t read every review personally so they first need to pre-filter obvious rubbish. Thankfully, one common mistake bots make is in using multiple adjectives that describe different degrees of a quality in an improper way. (You can think of the adjectives on a scale of intensity, with different scales for different qualities from low intensity to high intensity.) There are correct and incorrect ways of using such ‘scalar’ adjectives when describing widgets. For example, the phrase:

*good but not great* (CORRECT)

is perfectly acceptable and should be marked as such. But this phrase:

*furious but not angry* (WRONG)

makes no sense since *furious* is stronger than *angry* and therefore strictly subsumes *angry* – you can be angry, but not so much as to be furious, but you cannot be furious without being angry. Any review containing this phrase should be thrown away immediately since it definitely came from a bot rather than a human.

There are also some unclear cases. This phrase:

*furious but not good* (POSSIBLE)

seems odd since it compares two adjectives from different scales (anger and goodness). Such a review should raise a red flag but be inspected more closely before being thrown out.

Now, the sprocket marketplace is incredibly hip and so everyone writes using the latest slang. In order to write filtering software, the Zoink! admins (who are not so hip) first looked at a bunch of snippets from reviews written by real people. Here they are:

1. cromulent but not melaxious
2. not only efrimious but quarmic
3. not only hyxilious but fligranish
4. not only daxic but fligranish
5. not laxaraptic, but just hyxilious
6. not just melaxious but efrimious
7. not only quarmic, but nistrotic
8. shtingly, though not efrimious
9. not tamacious, just efrimious
10. not optaxic, just fligranish
11. not only cromulent but shtingly
12. not nistrotic, but just efrimious
13. not nistrotic, just tamacious
14. wilky but not daxic
15. not daxic, just jaronic
16. jaronic but not hyxilious
17. laxaraptic but not optaxic

Based on these snippets, the admins were able to understand how the different properties are connected so they were ready to decide whether further snippets were

- correct, i.e. they might easily have been written by humans
- wrong, i.e. they must have been written by bots
- possible, i.e. they might have been written by humans or by bots because they combine points on different scales.

On the next page is a selection of the further snippets:
(a) not only hyxilious but quarmic
(b) jaronic but not laxaraptic
(c) cromulent but not nistrotic
(d) not only tamacious, but melaxious
(e) not only shtingly but quarmic
(f) not fligranish, just wilky
(g) optaxic but not hyxilious
(h) cromulent but not jaronic
(i) not just optaxic but nistrotic

A1. Classify each of these snippets (a)-(i) as ‘correct’, ‘wrong’ or ‘possible’ by ticking the appropriate box in the answer book. (9 pts)

A2. Explain your answer. Include diagrams if that is helpful. (8 pts)

A3. Find a series of ordinary English adjectives that define more than three degrees of intensity on a single scale. (3 pts)

B. Malagasy crossnumber [25 pts]

Below is an example of a crossnumber puzzle. This type of puzzle is much like a crossword, except that each square in the grid is meant to hold a single digit rather than a single letter. Also note that the clues are not given in the order that the answers appear in the grid. (Note: solving this puzzle is not part of this problem ... read on!)

Clues
ACROSS
Clue number Answer
Eight     Sixty-seven thousand eight hundred and ninety-three
Eleven   Forty-one
Five     Thirty-eight thousand nine hundred and one
One      Seventy-four
Seven    Two hundred and forty-five
Ten      Fifty-five
Three    Twenty-six

DOWN
Clue number Answer
Eight     Sixty-five
Four      Sixty-one
Nine      Thirty-one
One       Seventy-three
Six       Nine hundred and forty-eight
Three     Twenty thousand five hundred and ninety-four
Two      Forty-eight thousand two hundred and seventy-five

Here is another crossnumber puzzle; this time, all of the numbers are written in
Malagasy, an Austronesian language and one of the official languages of Madagascar. Your task is to complete this puzzle and answer the questions that follow it. Remember, the clues are not given in the same order as the answers in the grid. Also, note that no answer has zero as its first digit.

**B1.** Complete the Malagasy crossnumber puzzle in your answer book (10 pts)

**B2.** Write the following numbers in Malagasy (15 pts)

   (a) 7
   (b) 15,968
   (c) 99,573
   (d) 80,638
   (e) 817
Maxakalí is an Amazonian language spoken in the eastern Brazilian region of Minas Gerais by about as few as 1200 indigenous inhabitants of small villages. In this problem you will have to match the Maxakalí words and phrases to their meanings in English. Both lists are presented in alphabetical order.

Pronunciation notes: The symbol ~ above a vowel means that it is pronounced nasally. The letter x represents a sound like English ‘sh’ and the ’ represents a glottal stop, the sound represented by the hyphen in ‘uh-oh’.

<table>
<thead>
<tr>
<th>Maxakalí</th>
<th>English</th>

<tr>
<td>9 miptut mõg kuxa</td>
<td>18 xax</td>
</tr>
</tbody>
</table>

C1. Determine the correct correspondences. (9 pts)

C2. Describe how the Maxakalí language makes words and list any other parts of words which don’t stand alone. If there are any words which may be ambiguous, please explain why and put forward a more likely guess. (16 pts)
D. Do this do that

Hmong is a language of Southern China and Southeast Asia, especially the countries of Vietnam, Laos, and Thailand. One dialect of Hmong that is spoken in all of these countries is called Hmong Daw (or White Hmong). The sentences and phrases that you see below are from Hmong Daw. They are written in a writing system called RPA (Romanized Popular Alphabet). In this writing system, the initial consonant of a syllable is written first, followed by the vowel. If this vowel is doubled in writing, it is pronounced as nasalized or with a following ng sound. Last of all, a consonant symbol is used to represent the tone of the syllable (whether it is produced with high, mid, low, rising, or falling pitch or some combination). Hmong Daw has seven tones, one of which is indicated by the absence of any symbol. In this system, Hmong is written as Hmoob.

In the following section, you are given a set of Hmong Daw sentences and phrases. English translations are presented in no particular order. You should be aware that the order of words may differ significantly between the Hmong phrases/sentences and their translations into English. Also note that the same word in English may translate to more than one word in Hmong, and vice versa.

Abbreviations: sg = singular; pl = plural

2. Nej sib pom lawm. 18. sib ntsib sib pom
3. phem dab phem tuag 19. tsis khib tsis chim
4. Kuv lub tsev nqeeb phem heev. 20. pe dab pe mlom
5. ua ib pawg 21. ib pab liab
7. Khib kuv heev. 23. ntau pab ntau pawg
12. Neeg Nplog pe mlom. 28. ntsis tauj ntsis nqeeb
14. Kuv tsis tau ntsib nwg. 30. thov ntuj thov dab
15. tsev hais plaub 31. ib tsob ntoo siab heev
16. neeg loj neeg siab

(A) a very tall tree  (H) It offends me very much.
(B) behave as one group  (I) We both are very ugly.
(C) grass sprouts  (J) Speak Hmong language.
(D) He planted a grass plant.  (K) Heaven is cold now.
(E) People fear spirits.  (L) petition deities
(F) some legal proceedings  (M) a band of monkeys
(G) He is very upset.  (N) You (pl) did not see me.
(O) You (pl) see each other now.           (X) You (sg) have gold.
(P) ugly as spirits and death            (Y) many factions
(Q) People pay silver to you.            (Z) I did not meet him.
(R) Lao people worship images.           (AA) revere images and spirits
(S) not angry or offended                (BB) court (house of speaking legal proceedings)
(T) My grass house is very ugly.         (CC) encounter one another
(U) big and tall people                  (DD) You (pl) have some big houses.
(V) Apes are like people.                (EE) We both met each other.
(W) Spirits don’t fear.                  

**D1.** Match the Hmong phrases and sentences (1)-(31) with their translations (A)-(EE) (20 pts)

**D2.** Translate the following phrases into Hmong: (10 pts)
(a) Lao and Hmong people
(b) behave as primates
(c) have precious metals
